Soft Controls Deep Dive Report

Organisational Risk Culture Assessment

PREPARED FOR	PREPARED BY	DATE	RESPONDENTS
Leadership Team	Risk Advisory — KPMG	15 April 2026	25 respondents

Confidential — For Authorised Personnel Only

© 2026 KPMG. All rights reserved.

INTRODUCTION

IMPORTANCE OF CULTURE & BEHAVIOUR

Organisational culture plays a critical role in shaping employee behaviour and risk outcomes. Increased regulatory focus has highlighted the need for measurable and auditable cultural drivers. Internal audit functions provide assurance by evaluating behavioural controls and identifying root causes behind control failures.

The International Standards for the Professional Practice of Internal Auditing stipulates that the internal auditor must pay explicit attention to soft controls.
It is fundamental to risk management and employee conduct.
Increasing regulatory attention is being paid to (risk) culture and conduct.

Our approach integrates **entity-level governance**, **process-level behavioural controls**, and **root cause analysis** to assess how culture influences decision-making and risk management.

THE 8 SOFT CONTROLS

Clarity
How clearly roles, responsibilities and behavioural expectations are communicated to employees.

Role Modelling
Whether leadership consistently demonstrates the desired risk-conscious behaviour.

Commitment
The degree to which employees take ownership and responsibility for risk management.

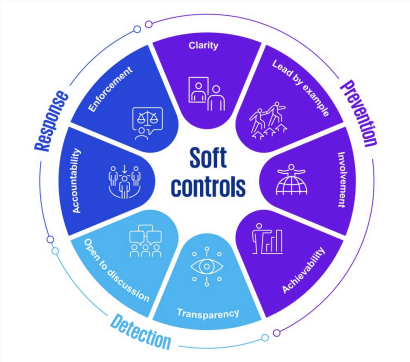
Transparency
How openly information, misconduct and consequences are shared across the organisation.

Discussability
How comfortably employees raise, discuss and escalate risks, concerns and dilemmas.

Call Someone to Account
Whether employees hold each other accountable for actions and outcomes.

Enforcement
How consistently policies, procedures and consequences are applied across the organisation.

Achievability
Whether targets and expectations are realistic and attainable for employees.



Key Insight
A strong risk culture enables organisations to proactively identify, assess, and respond to risks. Embedding these soft controls ensures consistency in behaviour, accountability, and long-term value creation.

KPMG's Soft Controls Model

It is necessary to consider the human factors that influence culture to truly understand what is happening within an organisation. KPMG integrates soft controls into audit methodologies to identify, measure, and monitor behavioural drivers.

The KPMG Risk Culture Model provides firms with a framework to evaluate their risk culture, assess the top priorities and implement changes to adapt to emerging risks and focus areas. Following rigorous scientific analysis on 150 cases of misconduct within organisations, it was found that there are eight cultural factors that are highly influential in driving behavioural patterns within organisations.

Based on research by Prof. Dr. Muel Kaptein, this model has been applied globally to strengthen risk culture and governance frameworks.

Strengthening your Risk Culture

Increasing regulatory scrutiny and evolving risks are key drivers for organisations to enhance their risk culture. Impactful management is not possible without effective measurement. It is essential that KPIs and metrics continuously evolve to meet the changing demands of both existing and emerging risks.

- Reduced fraud & integrity risk
- Enhanced public reputation
- Improved compliance
- Promotes innovation
- Increased financial performance

Role Modelling

75 Medium Risk

Employee Perception Score (out of 100)

DEFINITION

This soft control reflects the behavioural drivers that influence how openly employees discuss risks, concerns and mistakes. Strong performance in **Role Modelling** improves organisational learning and strengthens the overall governance environment.

Executive Insight Summary

- Role Modelling demonstrates a solid overall performance with an employee score of 75.0, indicating a generally positive perception.
- The strongest dimension is 'Leadership Encouragement to Escalate Risks' at 82.0, while 'Leadership Example-Setting in Risk Management' is the weakest at 71.0.
- Leadership should focus on enhancing visible example-setting to further embed risk management behaviors across the organization.

Leader vs Employee Gap Analysis

- Employee and leader perceptions of Role Modelling are perfectly aligned, with both groups scoring it at 75.0.
- This perfect alignment suggests a strong shared understanding and consistent experience regarding leadership's role in risk culture.
- It indicates that employees perceive leaders as embodying the risk culture to the same extent that leaders believe they are doing so.
- This consistency provides a stable foundation for further cultural development, as there are no significant perceptual discrepancies to address.

Dimension Performance

Dimension	Score	Performance
Leadership Example-Setting in Risk Management	71	Moderate
Executive Commitment to Risk Culture	76	Moderate
Leadership Encouragement to Escalate Risks	82	Strong
Long-Term Decision Awareness	73	Moderate

Key Dimension Insights

- The highest-scoring dimension is 'Leadership Encouragement to Escalate Risks' at 82.0, contrasting with the lowest, 'Leadership Example-Setting in Risk Management' at 71.0.
- This spread suggests that while leaders are effective at encouraging risk escalation, their practical demonstration of risk-aware behavior may be less visible or impactful.
- A practical implication is to develop more tangible and communicated examples of leadership's active engagement in risk management decisions and actions.

Survey Question Responses

Survey Question	Favourable	Unfavourable
I believe that my leaders and senior managers consistently act as positive role models, also when they are under time pressure or facing difficult trade-offs.	46%	12%
Leaders openly emphasize the importance of doing things the right way, even under time pressure	62%	8%
All the seniors encourage employees to identify, escalate and report all the concerns in a timely manner	73%	0%
When decisions are made by leaders, potential and long-term implications are usually considered.	54%	15%

Recommendations for Role Modelling

Implement Leader 360° Behaviour Feedback

High

WHY
Leaders may be unaware of how their actions are perceived, impacting their ability to role model effectively.

WHAT TO DO
Provide simple 360° feedback to leaders on risk-related behaviors (e.g., inviting challenge, listening), agreeing on 2-3 actions.

WHO LEADS
HR/OD

TIMELINE
Start in 3 months, annual thereafter

EXPECTED IMPACT: Increases leader self-awareness and drives targeted behavioral improvements, enhancing their credibility as role models.

Leaders Share Real Risk Lessons

Medium

WHY
Employees need to see leaders openly discuss mistakes and learning from them to feel safe doing the same.

WHAT TO DO
CXOs and BU Heads to share real examples of tough choices, risks considered, and lessons learned in staff meetings or videos.

WHO LEADS
CXOs/BU Heads

TIMELINE
Quarterly

EXPECTED IMPACT: Fosters psychological safety, encourages open discussion of risks, and normalizes learning from failures.

Introduce 'Show Your Work' Leadership Notes

Medium

WHY
Employees need to understand the rationale behind key decisions, especially those involving risk trade-offs.

WHAT TO DO
Leaders publish short notes after key decisions, outlining risks considered, alternatives, and the final rationale.

WHO LEADS
ExCo + Comms

TIMELINE
Within 1 month

EXPECTED IMPACT: Builds trust and transparency by demystifying decision-making, showing leaders actively manage risk.

Discussability

78 Medium Risk

Employee Perception Score (out of 100)

DEFINITION

This soft control reflects the behavioural drivers that influence how openly employees discuss risks, concerns and mistakes. Strong performance in **Discussability** improves organisational learning and strengthens the overall governance environment.

Executive Insight Summary

- Discussability shows a strong overall performance with an employee score of 78.0, indicating a healthy environment for risk dialogue.
- The highest-scoring dimension is 'Openness to Sharing Opinions' at 82.0, while 'Openness to Discussions' is the lowest at 72.0.
- To further strengthen this control, leadership should enhance general discussion forums to match the comfort levels in sharing individual opinions and reporting dilemmas.

Leader vs Employee Gap Analysis

- Employees perceive Discussability 3.0 points higher than leaders, indicating a slight divergence in perspectives.
- This modest gap suggests that while leaders believe they foster an environment of open discussion, employees experience it slightly more positively.
- It implies that leaders might underestimate the extent to which employees feel comfortable engaging in risk-related conversations.
- Leaders should explore specific areas where their perception might differ to ensure sustained and genuine openness across the organization.

Dimension Performance

Dimension	Score	Performance
Openness to Discussions	72	Moderate
Access to Guidance	78	Moderate
Openness to Sharing Opinions	82	Strong
Comfort in Reporting Risk Dilemmas	80	Strong

Key Dimension Insights

- The highest-scoring dimension is 'Openness to Sharing Opinions' at 82.0, while 'Openness to Discussions' scores lowest at 72.0.
- This spread suggests that employees are comfortable expressing individual views but may find broader, more structured discussions less accessible or encouraged.
- A practical implication is to implement structured forums or regular check-ins specifically designed to facilitate open risk discussions beyond individual opinions.

Survey Question Responses

Survey Question	Favourable	Unfavourable
Differences of opinion are respected during discussions about judgments or decisions	50%	12%
I can openly raise concerns without fear of negative consequences	54%	4%
Colleagues respond constructively when mistakes or concerns are raised management.	73%	4%
I feel comfortable escalating issues to Risk Management / Ethics & Independence / DPP when needed	69%	8%

Recommendations for Discussability

Introduce Anonymous Dilemma Slips

High

WHY
Employees may fear repercussions for raising sensitive ethical or risk dilemmas openly.

WHAT TO DO
Set up a quick, anonymous QR form for teams to submit dilemmas; managers pick one weekly to discuss how it would be handled.

WHO LEADS
HR + Compliance + Managers

TIMELINE
Within 1 month

EXPECTED IMPACT: Creates a safe space for discussing difficult issues, clarifies expectations, and builds confidence in handling risks.

Start Weekly '5-Minute Clarity Checks'

Medium

WHY
Unclear expectations or unresolved hesitations can lead to unaddressed risks and missed opportunities.

WHAT TO DO
Managers dedicate 5 minutes weekly to ask 'What's unclear?' and 'Where did we hesitate last week?', noting one action.

WHO LEADS
People Managers + HRBP

TIMELINE
Within 1 month, then weekly

EXPECTED IMPACT: Proactively identifies and addresses ambiguities or emerging risks, fostering a culture of open communication.

Launch 'What Would You Do?' Shorts

Medium

WHY
Employees need practical guidance on navigating ethical and risk situations in an engaging format.

WHAT TO DO
Bi-weekly upload a 60-second case video; employees vote on options; publish the correct escalation path and rationale.

WHO LEADS
Compliance + Comms

TIMELINE
Within 2 months, then bi-weekly

EXPECTED IMPACT: Educates employees on appropriate risk responses in an engaging way, building confidence and consistency.

Achievability

72 Medium Risk

Employee Perception Score (out of 100)

DEFINITION

This soft control reflects the behavioural drivers that influence how openly employees discuss risks, concerns and mistakes. Strong performance in **Achievability** improves organisational learning and strengthens the overall governance environment.

Executive Insight Summary

- Achievability demonstrates a moderate overall performance with an employee score of 72.0, suggesting room for improvement in practical risk management.
- The strongest dimension is 'Adequacy of Risk Management Training' at 75.0, whereas 'Risk Insight in Decision Making' is the weakest at 68.0.
- Leadership should prioritize integrating risk insights more effectively into daily decision-making processes to enhance practical application.

Leader vs Employee Gap Analysis

- Leaders perceive Achievability 11.3 points higher than employees, indicating a significant perceptual gap.
- This substantial difference suggests leaders may overestimate the extent to which employees feel they have the resources, training, and realistic targets to manage risks effectively.
- It implies a potential disconnect in understanding the practical challenges employees face in integrating risk management into their daily work.
- Leadership should investigate the underlying reasons for this gap, particularly concerning workload, resources, and the practical application of risk insights.

Dimension Performance

Dimension	Score	Performance
Adequacy of Risk Management Training	75	Moderate
Workload Balance & Resource Sufficiency	72	Moderate
Realistic Target Setting	74	Moderate
Risk Insight in Decision Making	68	Weak

Key Dimension Insights

- The highest-scoring dimension is 'Adequacy of Risk Management Training' at 75.0, contrasting with the lowest, 'Risk Insight in Decision Making' at 68.0.
- This spread suggests that while training is perceived as adequate, its practical application and integration into actual decision-making remain a challenge.
- A practical implication is to develop practical tools and frameworks to embed risk insights directly into routine decision-making processes, moving beyond theoretical training.

Survey Question Responses

Survey Question	Favourable	Unfavourable
I have received enough training to handle job-related challenges effectively.	58%	23%
Within my team or department people have enough time and resources to do their job without taking unacceptable risks	50%	12%
People set targets that are achievable without compromising risk management policies, guidelines and procedures.	62%	15%
People visibly consider potential risks when making strategic decisions	46%	27%

Recommendations for Achievability

CEO-Led Realistic Target Review

High

WHY
Unrealistic targets drive risk-taking and burnout, directly impacting risk culture and employee well-being.

WHAT TO DO
Executive Committee to conduct a top-down review of key business targets, ensuring they are achievable with current resources.

WHO LEADS
CXOs/BU Heads (led by CEO)

TIMELINE
Within 1 month

EXPECTED IMPACT: Reduces pressure-induced risk-taking and signals leadership's commitment to sustainable performance.

Implement Bi-Monthly Workload Mapping

Medium

WHY
Overloaded teams are prone to errors and cutting corners, increasing operational risk and stress.

WHAT TO DO
Mandate bi-monthly workload mapping for all teams, identifying overload and reallocating tasks or adjusting priorities.

WHO LEADS
HR + BU Leaders

TIMELINE
Within 2 months, then bi-monthly

EXPECTED IMPACT: Proactively manages capacity, reduces stress, and ensures quality work without undue pressure.

Empower Managers with Priority Swaps

Medium

WHY
Lack of clear prioritization leads to confusion and unachievable expectations, hindering focus.

WHAT TO DO
Introduce a 'Priority Swap Log' where managers document new tasks and which lower-priority tasks will be paused.

WHO LEADS
All People Managers

TIMELINE
Within 1 month

EXPECTED IMPACT: Provides clarity on priorities, prevents overload, and ensures focused effort on critical tasks.

Enforcement

75 Medium Risk

Employee Perception Score (out of 100)

DEFINITION

This soft control reflects the behavioural drivers that influence how openly employees discuss risks, concerns and mistakes. Strong performance in **Enforcement** improves organisational learning and strengthens the overall governance environment.

Executive Insight Summary

- Enforcement shows a moderate overall performance with an employee score of 75.0, indicating a baseline level of perceived compliance.
- The strongest dimension is 'Organizational View on Risk Culture' at 84.0, while 'Sense of Ownership' is the weakest at 68.0.
- Leadership should focus on strengthening individual sense of ownership to align with the strong organizational view of risk culture.

Leader vs Employee Gap Analysis

- Leaders perceive Enforcement 16.7 points lower than employees, indicating a substantial and concerning divergence.
- This significant gap suggests that leaders may feel less confident in the organization's enforcement mechanisms than employees do, or they perceive a greater need for improvement.
- It implies that leaders might be more acutely aware of the challenges in consistently applying compliance recognition and addressing non-compliance.
- Leadership should critically assess their own perceptions and identify specific areas where enforcement practices need to be strengthened to meet employee expectations and organizational standards.

Dimension Performance

Dimension	Score	Performance
Learning Culture from Non-Compliance Cases	70	Moderate
Organizational View on Risk Culture	84	Strong
Compliance Recognition & enforcement	78	Moderate
Sense of Ownership	68	Weak

Key Dimension Insights

- The highest-scoring dimension is 'Organizational View on Risk Culture' at 84.0, contrasting sharply with 'Sense of Ownership' at 68.0.
- This spread suggests that while there is a strong collective understanding of risk culture, individual accountability and personal ownership for risk are lagging.
- A practical implication is to implement initiatives that clearly link individual roles and responsibilities to the broader risk culture, fostering a stronger personal sense of ownership.

Survey Question Responses

Survey Question	Favourable	Unfavourable
I have observed changes implemented as a result of past issues or incidents.	38%	15%
Ways of handling work challenges are followed consistently across the organization.	73%	0%
Good behaviors related to quality and ethics are recognized and appreciated.	65%	12%
I feel confident and supported to make important decisions within my role.	46%	27%

Recommendations for Enforcement

Publish Consistent Consequences Grid

High

WHY
Inconsistent enforcement erodes trust and encourages rule-breaking, undermining risk culture.

WHAT TO DO
Create and publish an internal 'Consistent Consequences Grid' mapping behaviors to actions, sharing anonymized examples quarterly.

WHO LEADS
Compliance + Legal + Comms

TIMELINE
Within 2 months, then quarterly

EXPECTED IMPACT: Ensures fairness and transparency in disciplinary actions, reinforcing accountability across all levels.

Provide Status Updates to Reporters

Medium

WHY
Lack of feedback discourages reporting concerns, creating a culture of silence and distrust.

WHAT TO DO
Implement a protocol to send status updates to individuals who report concerns, acknowledging receipt and confirming closure (without sensitive details).

WHO LEADS
Compliance Case Manager

TIMELINE
Within 1 month

EXPECTED IMPACT: Builds trust in the reporting process, encouraging more employees to speak up without fear of their concerns being ignored.

Monthly Enforcement Alignment Huddle

Medium

WHY
To ensure consistency in how HR and Compliance handle cases across different functions and levels.

WHAT TO DO
HR and Compliance teams meet monthly to review 3-4 recent cases, ensuring decisions are aligned and consistent.

WHO LEADS
HR + Compliance

TIMELINE
Within 1 month, then monthly

EXPECTED IMPACT: Reduces perceived bias and inconsistency, strengthening the credibility of enforcement mechanisms.

Clarity

75 Medium Risk

Employee Perception Score (out of 100)

DEFINITION

This soft control reflects the behavioural drivers that influence how openly employees discuss risks, concerns and mistakes. Strong performance in **Clarity** improves organisational learning and strengthens the overall governance environment.

Executive Insight Summary

- Clarity demonstrates a solid overall performance with an employee score of 75.0, indicating a generally good understanding of risk parameters.
- The strongest dimension is 'Clarity of Personal Risk Boundaries' at 80.0, while 'Clarity of Role and Responsibilities' is the weakest at 68.0.
- Leadership should prioritize enhancing clarity around individual roles and responsibilities within the risk management framework.

Leader vs Employee Gap Analysis

- Employee and leader perceptions of Clarity are perfectly aligned, with both groups scoring it at 75.0.
- This perfect alignment indicates a consistent understanding across all levels regarding the clarity of risk-related information and expectations.
- It suggests that both leaders and employees share a similar experience concerning the effectiveness of risk communication and the understanding of policies.
- This shared perspective provides a stable foundation for targeted improvements, particularly in areas identified as weaker within the dimensions.

Dimension Performance

Dimension	Score	Performance
Clarity of Role and Responsibilities	68	Weak
Understanding of Risk Policies & Procedures	76	Moderate
Clarity of Personal Risk Boundaries	80	Strong
Effectiveness of Risk Communication & Training	75	Moderate

Key Dimension Insights

- The highest-scoring dimension is 'Clarity of Personal Risk Boundaries' at 80.0, while 'Clarity of Role and Responsibilities' scores lowest at 68.0.
- This spread suggests that individuals understand their personal limits but are less clear on their specific roles and responsibilities within the broader risk framework.
- A practical implication is to review and clearly articulate individual roles and responsibilities in risk management, ensuring these are well-communicated and understood across the organization.

Survey Question Responses

Survey Question	Favourable	Unfavourable
I understand the purpose of my roles and responsibilities	38%	23%
Within my team or department the level of understanding of our policies, procedures or guidelines for risk management is high.	54%	4%
I understand the consequences of not following the firm policies	65%	12%
The guidance and training I receive are clear and help me make good decisions.	62%	12%

Recommendations for Clarity

Clarify Key Decision-Making Processes

High

WHY
Ambiguity in decision-making leads to delays, errors, and a lack of accountability for risk outcomes.

WHAT TO DO
Publish short guides for common decisions, detailing who decides, required inputs, timelines, and escalation paths.

WHO LEADS
PMO + Function Heads + Comms

TIMELINE
Within 2 months

EXPECTED IMPACT: Reduces confusion, speeds up decision-making, and ensures appropriate risk considerations are consistently applied.

Mandate Team Responsibility Mapping

Medium

WHY
Unclear roles and responsibilities create gaps in risk ownership and accountability, leading to dropped balls.

WHAT TO DO
Require all teams to conduct sessions to create simple responsibility maps (e.g., RACI) for key processes and agree on handoffs.

WHO LEADS
Team Leads + HR/PMO

TIMELINE
Within 2 months

EXPECTED IMPACT: Clarifies individual and team accountabilities, reducing duplication and ensuring all risk areas are covered.

Host Monthly 'Ask Anything' Hours

Medium

WHY
Employees need direct channels to clarify doubts and get answers on policies, processes, and decisions.

WHAT TO DO
Department heads host monthly 45-minute open Q&A sessions, allowing anonymous questions, with a written summary published.

WHO LEADS
Function Heads + Comms

TIMELINE
Within 1 month, then monthly

EXPECTED IMPACT: Provides a direct channel for clarification, reduces ambiguity, and builds trust through open communication.

Transparency

75 Medium Risk

Employee Perception Score (out of 100)

DEFINITION

This soft control reflects the behavioural drivers that influence how openly employees discuss risks, concerns and mistakes. Strong performance in **Transparency** improves organisational learning and strengthens the overall governance environment.

Executive Insight Summary

- Transparency shows a moderate overall performance with an employee score of 75.0, indicating a baseline level of openness.
- The strongest dimension is 'Fairness & Equity of Expectations' at 81.0, whereas 'Compliance Confidence in team' is the weakest at 72.0.
- Leadership should focus on improving transparency in decision-making and fostering greater compliance confidence within teams.

Leader vs Employee Gap Analysis

- Leaders perceive Transparency 25.0 points lower than employees, indicating a very significant and concerning perceptual gap.
- This substantial discrepancy suggests that leaders are significantly less confident in the organization's transparency than employees, or they perceive a greater need for improvement.
- It implies that leaders might be more acutely aware of the challenges in transparent decision-making and communication, potentially due to their vantage point.
- Leadership must critically examine the root causes of this large gap, focusing on enhancing transparency in decision-making processes and fostering greater trust.

Dimension Performance

Dimension	Score	Performance
Compliance Confidence in team	72	Moderate
Transparency in Decision-Making	73	Moderate
Fairness & Equity of Expectations	81	Strong
Leadership Awareness in the team	75	Moderate

Key Dimension Insights

- The highest-scoring dimension is 'Fairness & Equity of Expectations' at 81.0, contrasting with 'Compliance Confidence in team' at 72.0.
- This spread suggests that while expectations are perceived as fair, there's less confidence in team-level compliance and the transparency of decision-making processes.
- A practical implication is to implement structured communication channels for decision-making rationale and reinforce team-level compliance processes to build greater confidence.

Survey Question Responses

Survey Question	Favourable	Unfavourable
I understand what is expected of me and it is clearly available to me in form of a policy	54%	19%
How key decisions are made within my team is transparent	50%	12%
Expectations are applied consistently across team members.	69%	0%
Managers have a good understanding of what is happening within the team.	58%	19%

Recommendations for Transparency

Launch Monthly 'You Said, We Did' Updates

High

WHY
Lack of feedback on concerns raised creates distrust and discourages future input from employees.

WHAT TO DO
Publish a monthly intranet/email update summarizing issues raised, actions taken, and any constraints, demonstrating responsiveness.

WHO LEADS
Corporate Comms + HR + CEO Office

TIMELINE
Within 1 month, then monthly

EXPECTED IMPACT: Builds trust by showing employee feedback is valued and acted upon, fostering a more open and engaged culture.

Publish 'This Month in Decisions'

Medium

WHY
Employees often feel out of the loop on key organizational decisions, leading to speculation and disengagement.

WHAT TO DO
Publish monthly micro-updates highlighting 5 key decisions, explaining what changed for teams, and linking to updated documents.

WHO LEADS
Corporate Comms + ExCo

TIMELINE
Within 1 month, then monthly

EXPECTED IMPACT: Increases understanding of strategic direction and decision-making, reducing uncertainty and fostering alignment.

Create Visual Guides for Key Processes

Medium

WHY
Complex processes are often poorly understood, leading to errors, non-compliance, and frustration.

WHAT TO DO
Develop and share short, visual, one-page guides for confusing processes (e.g., incident handling, promotions), including key contacts.

WHO LEADS
Process Owners + Comms

TIMELINE
Within 2 months (for top 3 processes)

EXPECTED IMPACT: Improves understanding and adherence to critical procedures, reducing operational risks and employee frustration.

Commitment

74 Medium Risk

Employee Perception Score (out of 100)

DEFINITION

This soft control reflects the behavioural drivers that influence how openly employees discuss risks, concerns and mistakes. Strong performance in **Commitment** improves organisational learning and strengthens the overall governance environment.

Executive Insight Summary

- Commitment demonstrates a moderate overall performance with an employee score of 74.0, suggesting a foundational level of dedication to risk culture.
- The strongest dimension is 'Sense of Belonging to the Organization' at 77.0, while 'Motivation for Risk Ownership' is the weakest at 72.0.
- Leadership should focus on enhancing motivation for individual risk ownership to align with the strong sense of organizational belonging.

Leader vs Employee Gap Analysis

- Leaders perceive Commitment 11.5 points lower than employees, indicating a notable perceptual gap.
- This significant difference suggests that leaders may feel less confident in the overall commitment to risk culture than employees do, or they perceive a greater need for improvement.
- It implies that leaders might be more acutely aware of the challenges in fostering motivation for risk ownership and accountability for risk actions.
- Leadership should investigate the specific factors contributing to their lower perception, focusing on strengthening individual and collective commitment to risk management.

Dimension Performance

Dimension	Score	Performance
Motivation for Risk Ownership	72	Moderate
Sense of Belonging to the Organization	77	Moderate
Consideration of Impact on Others	75	Moderate
Accountability for Risk Actions	73	Moderate

Key Dimension Insights

- The highest-scoring dimension is 'Sense of Belonging to the Organization' at 77.0, while 'Motivation for Risk Ownership' scores lowest at 72.0.
- This spread suggests that employees feel connected to the organization, but this doesn't fully translate into strong individual motivation for risk ownership.
- A practical implication is to develop targeted programs that clearly link individual contributions to organizational success, thereby boosting motivation for personal risk ownership.

Survey Question Responses

Survey Question	Favourable	Unfavourable
People in my team feel motivated to handle challenges responsibly.	54%	12%
Feedback from team members is considered when improving ways of working.	62%	4%
I consider the impact on others before failing to meet commitments of my own tasks.	62%	15%
I feel involved in decisions that affect how work is carried out.	58%	12%

Recommendations for Commitment

Launch CEO-Sponsored Culture Plan

High

WHY
Low commitment score indicates employees doubt leadership's dedication to risk culture initiatives.

WHAT TO DO
Publish a clear 6-month culture plan with 3-5 measurable actions, owners, and monthly executive progress reviews.

WHO LEADS
CEO Office + CHRO

TIMELINE
Within 1 month

EXPECTED IMPACT: Demonstrates tangible executive commitment, provides clear direction, and builds trust through visible progress.

Integrate Culture Metrics in Leader Scorecards

Medium

WHY
Leaders need to be held accountable for fostering a strong risk culture, not just financial results.

WHAT TO DO
Add key risk culture metrics (e.g., speak-up usage, sentiment trends) to leader performance scorecards and reviews.

WHO LEADS
CEO + CHRO + BI

TIMELINE
Next performance cycle (within 3 months)

EXPECTED IMPACT: Reinforces that culture is a strategic priority, driving leaders to actively promote desired behaviors.

Establish Cross-Functional Culture Champions

Medium

WHY
To ensure culture initiatives are embedded and sustained across the organization, not just top-down.

WHAT TO DO
Nominate a network of culture champions in each function to gather feedback, share wins, and keep initiatives moving.

WHO LEADS
HR/Comms

TIMELINE
Within 2 months

EXPECTED IMPACT: Creates grassroots ownership and provides a vital feedback loop, ensuring culture efforts resonate with employees.

Call Someone to Account

70 Medium Risk

Employee Perception Score (out of 100)

DEFINITION

This soft control reflects the behavioural drivers that influence how openly employees discuss risks, concerns and mistakes. Strong performance in **Call Someone to Account** improves organisational learning and strengthens the overall governance environment.

Executive Insight Summary

- Call Someone to Account shows a moderate overall performance with an employee score of 70.0, indicating a baseline ability to enforce accountability.
- No specific dimensions are available to highlight strengths or weaknesses for this control.
- Leadership should conduct further qualitative analysis to understand the underlying factors contributing to this score and identify areas for improvement.

Leader vs Employee Gap Analysis

- Leader interview data not available for this parameter.
- No gap analysis can be performed without leader scores.

Dimension Performance

Dimension	Score	Performance
Peer to peer Accountability	66	Weak
Timely Resolution of Accountability Issues	67	Weak
Comfort for Reporting Non-Compliance.	76	Moderate
Consistency of Conduct Enforcement	72	Moderate

Key Dimension Insights

- With an employee score of 70.0, the organization demonstrates a moderate ability to hold individuals accountable for risk-related actions.
- This overall score suggests that while some mechanisms for accountability exist, there may be inconsistencies or areas requiring reinforcement.
- To improve, it is crucial to establish clear accountability frameworks and ensure their consistent application across all levels.

Survey Question Responses

Survey Question	Favourable	Unfavourable
I feel responsible for speaking up if I observe behavior that does not align with my organizations values	42%	35%
Accountability issues are addressed soon after they arise in my team	38%	15%
I feel comfortable to report when someone is non-compliant with regard to policies, procedures or guidelines	62%	15%
Team members are held to the same behavioral standards, no matter who they are.	54%	12%

Recommendations for Call Someone to Account

Embed Accountability in Leader Reviews

High

WHY
The lowest score indicates a lack of clear consequences for poor risk behavior or inaction, eroding trust.

WHAT TO DO
Integrate specific risk culture metrics and accountability for risk outcomes into leader performance reviews.

WHO LEADS
CEO + CHRO

TIMELINE
Next performance cycle (within 3 months)

EXPECTED IMPACT: Leaders will understand that risk accountability is a core part of their role, driving behavioral change.

Publish Consistent Consequence Examples

Medium

WHY
Employees need to see that rules apply equally to all, fostering trust and encouraging reporting.

WHAT TO DO
Quarterly publish anonymized examples of how misconduct or policy breaches were addressed, including actions taken.

WHO LEADS
Compliance + Legal + Comms

TIMELINE
Within 2 months, then quarterly

EXPECTED IMPACT: Increases perception of fairness and consistency, reinforcing that actions have consequences.

Clarify Escalation & Accountability Paths

Medium

WHY
Employees may not know how or to whom to escalate issues, leading to inaction and unaddressed risks.

WHAT TO DO
Publish a simple, visual guide detailing escalation paths for risk concerns and who is accountable at each stage.

WHO LEADS
Compliance + PMO + Comms

TIMELINE
Within 1 month

EXPECTED IMPACT: Empowers employees to act and ensures issues reach the right people for timely resolution.
